

REMARKS

This application was originally filed on 31 December 2001 with thirty-six claims, nine of which were written in independent form. No claims have been allowed. Claims 13, 19, 20, 24, and 35 have been amended to broaden the claims and to clarify what is being claimed.

Claims 9-12, 16-18, 29-34 have been canceled without prejudice.

The specification was objected to as failing to provide proper antecedent basis for the claimed subject matter and Claim 35 was rejected under 35 U.S.C. § 112, first paragraph, as failing to comply with the written description requirement. Claim 35 has been amended to overcome these rejections and to recite spatial light modulator rather than display engine to clarify what is being claimed.

Claims 13-15, 19, and 24 were rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the applicant regards as the invention. Claims 13, 19, and 24 were amended to overcome this objection.

In view of the amendments and the remarks presented herewith, it is believed that the claims currently in the application accord with the requirements of 35 U.S.C. § 112 and are allowable over the prior art of record. Therefore, it is urged that the pending claims are in condition for allowance. Reconsideration of the present application is respectfully requested.

Respectfully submitted,

Charles A. Brill
